## Depositor 24 SD

The CMC-America 24 SD Depositor is a wide body, continuous extrusion machine for bakers who want added volume capacity without added man hours. While the production capacity of the 24 SD will vary based on cookie size, cookie shape/design and dough texture, the 24 SD will prepare up to 15,000 pieces per hour. Also perfect for heavy muffin doughs, scones, biscuits and other recipes, the 24 SD is easy to operate and maintain. The continuous feed pan guide is adjustable for 26" wide pans. 'Go Wide' with the 24 SD and enjoy the benefits of CMC-America's expertise in continuous dough extrusion.

### 1 Higher Production Volumes.... Same Ease of Use

Whether you are producing cookies, brownies, heavy-dough muffins, scones or other recipes, you will see increased production with reliable weight conformity without increased man hour costs, vs. smaller depositing machines. What's more, all food area parts are easily removable for quick cleaning and replacement and its sturdy 4" casters make the 24 SD easily movable.

### 2 Safe, Sanitary with Numerous Applications

Made of stainless steel, no-rust aluminum and UHMW polyurethane, the 24 SD ensures sanitation throughout the product zone. Safety guards keep all moving parts enclosed, and all moving parts are no-tool removable and dishwasher safe for quick cleaning and recipe change-out. Filler block dies are available in every conceivable shape, holiday and recipe. We will make custom dies for you as needed.

### 3 Variable Speed Control

Each and every CMC-America depositor has variable speed control, meaning that you are in total charge of production speed and volume. Both extrusion speed and pan feed are adjustable. This is very important for the baker who runs multiple recipes and multiple products (i.e. scones, cookies, etc.) each day. Its even more important when you grow and need to produce in even larger quantities. The 24 SD offers a standard 45 qt. hopper. Larger sizes are available.

Shown with Optional  
Endless, Receiving Belt  
and Nose-Bar
